

# Create your own Web site with Dreamweaver

## *Week 3 notes*

### **Planning a Website**

- PowerPoint
- Step 1 (Needs Analysis) Define your purpose
  - Why are you building this site?
  - Is there a need?
  - Is there a desire?
  - What is the primary objective?
  - What is your mission statement?
- Step 2 (User Analysis) Define your user
  - Who will be coming to the site?
  - What will they want?
  - What do you want them to want?
  - Can they get it now? How?
  - What will they be able to do?
  - How tech savvy are they?
  - What is your LCD?
  - How will you define the user later on?
- Step 3 Define your environment
  - Where will you host?
    - How much drive space will you need?
    - Will you need extra bandwidth?
    - Will you need a database?
  - How often do you need to make changes?
  - Will the user be making changes?
